<b>6. Title of proposed action:</b> Clifton Mining Company - Cactus Mill Large Mining Operation - M/045/049	
<b>7. Description:</b> <u><b>During Operations:</b></u> The fenced milling operation will process up to 200 tons/day of mined ore. The ore will be mined locally, crushed, then ground and put through a gravity separation process to produce a concentrate. The remaining precious metals will be extracted using a flotation process with standard flotation reagents. All waste tailings will be stored onsite in a series of lined impoundments. The concentrates will be transported to an off site processing facility for further refinement.  <u><b>After Operations:</b></u> After the milling and concentrating of ores is complete, all surface structures and processing facilities will be dismantled and removed from the site. The wood framed mill building will remain after mill site reclamation because of its historical significance to the mining district. Disturbed areas will be regraded and reclaimed to blend into the surrounding topography. The disturbed area will be topsoiled and reseeded to benefit wildlife and grazing postmining land uses.
